

21.2.3.1

What are the differences between HashSet, linkedHashSet, and TreeSet?

Linked and hash do not sort the set.

- HashSet is unsorted, but TreeSet is sorted.
- HashSet is more efficient than TreeSet.

How do you sort elements in a set using the compareTo method in the Comparable interface?

1. Create a TreeSet using new TreeSet()
2. Create a TreeSet from a set using new TreeSet(set)

How do you sort elements in the set using the Comparator interface?

Create a TreeSet using
new TreeSet(Comparator) then
add the elements to the
tree set.
