

19.2.2

Fill in the code in Comparable — `c = new Date();`

<Date>

Suppose `ArrayList<Double> list = new ArrayList<>();`  
which of the following statements are correct?

`list.add(5.5);` // 5.5 is automatically converted  
to `Double.valueOf(5.5)`

`list.add(3.0);` // 3.0 is automatically converted  
to `Double.valueOf(3.0)`

`Double doubleObject = list.get(0);` // No casting  
is needed

`double d = list.get(1);` // Automatically  
converted to double

(All correct)
